

Peak Ship for NetSuite

Streamlining Your Shipping Processes

Alta Via Consulting
We provide the solution

Key Features for Every Carrier: Empowering Your Shipping Operations

- **Set Up Account:** Simplify setting up carrier accounts directly within NetSuite.
- **Create Shipments:** Effortlessly generate shipping orders within your NetSuite account.
- **Create Shipping Labels:** Streamline your packaging process by instantly receiving shipping labels.
- **Print Labels:** Automatically print shipping labels directly in the warehouse.
- **Get Tracking Numbers and Delivery Status Instantly:** Monitor your shipments at any time by checking the assigned tracking numbers and their current status in NetSuite.

Extensive Carrier Integration: A Solution for Every Shipper

We have included a variety of carriers based on customer requirements, allowing you to select the logistics partner that best meets your business needs. Currently, we support the following carriers:

- **DHL**
- **TNT**
- **DPD**
- **UPS**
- **Geodis**
- **FedEX**
- **GLS**

Can't find your preferred carrier on the list? Contact us, and we'll gladly add it to our list. Our shipping integration works with NetSuite Standard and NetSuite WMS configurations.

Shipping label PDFs are available on the item fulfillment.

We support multiple accounts per carrier and multiple packages per item fulfillment.

Our printing partner is Printnode.
